

DEMAND PERFORMANCE

One vulnerable server can compromise your entire network

Your online business needs uninterrupted service 24/7. Downtime means lost revenue and dissatisfied customers. How can you be certain your online business or organization runs at peak efficiency? Demand performance and take control of your online presence with the AlertSite® monitoring suite, systems monitoring and security scanning products.

DEMAND PERFORMANCE

A telephone company's customer account portal is offline for most of the weekend; an online retail store loses thousands of sales because of slow load times; and, due to a security vulnerability, a national research organization's systems are breached. What can you do to protect your business or organization? Find out why over 2,300 companies worldwide trust AlertSite.

With increasing competition and demand for ROI, online companies must be sure their Web sites and applications run at peak performance. AlertSite® products and services provide you with the detailed information you need to stay competitive. Measure performance from multiple locations simultaneously—and receive timely detailed reports that help you quickly identify and resolve problems.

Take Control of Your Online Presence

AlertSite products enable you to achieve and maintain peak performance with your Web pages and Internet applications. We can help you:

- Reduce costly downtime by notifying you immediately when errors occur with your Web site, server or Web-based application.
- Identify and eliminate security vulnerabilities with AlertSite's security scan.
- Deliver proof of performance to management and customers with consistent collection of performance metrics for all applications.
- Measure critical Web page performance, services and transactions for your customers, partners, employees and prospects.
- Analyze and solve problems quickly using on-demand site diagnostics.
- Measure and report performance metrics against service level agreements (SLAs) with AlertSite's unique SLA Manager.
- Optimize e-business services with a global perspective of Web performance and the end-user experience.

AlertSite Monitoring Suite

Optimize your Web-based services and deliver a superior online experience to all your customers.

AlertSite Business Transaction Monitor, with DéjàClick

Test your important Web transactions as often as every five minutes with DéjàClick™. DéjàClick collects performance metrics from multiple geographic locations for each step of an interaction and provides a complete, detailed view of what has occurred.

DéjàClick, with TrueUser™ monitoring, is the industry's first inside-the-browser business transaction recorder. Install DéjàClick in your Mozilla Firefox browser and record even the most complex of transactions. DéjàClick scripts can be uploaded directly into your AlertSite account so you can begin monitoring your transactions in minutes.

AlertSite Web Site Performance Monitor

Gain an end-to-end perspective of Web performance and availability by monitoring from multiple locations simultaneously. URLs are tested as often as every minute from our global monitoring network. Receive instant notifications of errors.

AlertSite SLA Performance Monitor

Make sure your business is meeting required performance standards. Measure and report SLA compliance, correlate errors across locations and monitor true uptime. You can opt for premier upgrades, as well as full-page content monitoring and the ability to monitor from multiple cities around the globe.

AlertSite Server Availability Monitor

Monitor your server and network availability 24/7. AlertSite® ensures your Web pages, servers and Internet-connected devices are always up and running.

AlertSite E-mail Monitor

Detect, diagnose and resolve impending e-mail outages—all before your end users realize you are down, with AlertSite's roundtrip E-mail Monitor.

AlertSite Security Vulnerability Scan

Keep your Web site safe and secure from hackers and viruses. The AlertSite Security Vulnerability Scan identifies over 14,000 known vulnerabilities in real-time, categorizes the risks and provides solutions or recommendations.

AlertSite On-Demand Web Load Test

Determine how well your online applications handle the stress of maximum user demand. Simulate any number of simultaneous users of your Web pages, and receive complete test results immediately. Results include recommendations for eliminating bottlenecks and fine tuning applications to accommodate heavier Web site traffic. Test your Web pages any time, on a pay-as-you-go, self-service basis.

InSite By AlertSite

Get your very own monitoring station in a box. Deploy InSite by AlertSite at any location. From a client's place of business, InSite provides objective performance data that can be measured against SLAs. From your own data center, InSite can monitor internal network applications that are not visible from the Internet. InSite includes all the features of AlertSite's Web Performance Monitor, Business Transaction Monitor with DejaClick, Email Monitor, and Server Availability Monitor, and supports up to 100 monitors at once.

AlertSite ServerAgent

Gain a more complete view of your online environment. ServerAgent collects server metrics and monitors CPU load, disk utilization and other server processes. ServerAgent resides on almost any Windows or Linux server connected to the Internet. When combined with AlertSite's Web site measurement and transaction monitoring services, ServerAgent helps provide a complete end-to-end view of your environment so you can quickly identify system failures and optimize your service delivery.

AlertSite is the recognized world leader in Web performance management.

AlertSite® is a leading provider of Web performance measurement, systems monitoring and security vulnerability scanning products that ensure a customer's critical Web-based services are always available and running at peak performance. AlertSite services benefit all types and sizes of businesses and organizations.

Enjoy 24/7 Global Monitoring

Founded in 1998, AlertSite is based in South Florida and maintains over 40 global monitoring stations in highly qualified data centers on every continent but Antarctica. Our global network monitors the availability and performance of your Web site, Web-based applications and transactions wherever they are operating across the globe. When trouble occurs, AlertSite helps you isolate the location of the problem.

Talk with Proven Performance Advisors
